

FREDERICK CHON

Los Angeles, CA · frederick.chon@gmail.com · (626) 689-5030 · <https://www.frederickchon.com/>

SUMMARY

Self taught developer that is curious about all aspects of web development but primarily focused on HTML5/CSS3/JavaScript. Currently seeking a junior level front end position to work with and learn from experienced developers to not only grow as a developer but also as an individual.

PROJECTS

Easybank *HTML5, CSS3, SCSS, JavaScript* <https://frederick-chon.github.io/Easybank/>
Online banking landing page challenge from FrontEndMentor where users are presented with a design to replicate while following a style guide. This goal of this project is to practice using a mobile first approach to create a responsive landing page by using BEM and utilizing Sass architecture for readable code.

Fylo *HTML5, CSS3* <https://frederick-chon.github.io/Fylo-landing-page/>
File storage landing page challenge from FrontEndMentor where users are given a design to build following a style guide. The purpose of this project is to practice using Flexbox to achieve responsive layouts while emulating a real world work assignment by following a given design and style guide.

Insure *HTML5, CSS3, JavaScript* <https://frederick-chon.github.io/Insure-landing-page/>
Life insurance landing page challenge from FrontEndMentor with the goal of learning how to build a responsive landing page while following a strict design and style guide. The purpose of this project is to emulate a work assignment by creating a landing page that follows the design as closely as possible.

PerfectBrew *HTML5, CSS3/SCSS, JavaScript(ES6)* <https://github.com/Frederick-Chon/PerfectBrew>
Food and beer pairing application where users search for their favorite food to find beers that pair well with them. This project uses Brewdog's API to search for beer pairings before using JavaScript to loop through the results to be displayed in the DOM. The goal of this project is to practice making API requests before using JavaScript to manipulate the DOM by creating card elements with the data from the API.

Nexter *HTML5, CSS3/SCSS* <https://github.com/Frederick-Chon/Nexter>
Real estate agency landing page showcasing various properties in a grid layout. The goal of this project is to utilize CSS Grid's features to create a responsive layout and image gallery.

SmartBrain *JavaScript(ES6), React, Node, Express*
<https://github.com/Frederick-Chon/smartbrain-face-recognition>
Full stack application that connects to Clarifai's face detection API to draw a box on faces of user submitted images. The goals of this project is to understand how powerful component based designs can be and how the front end communicates with the back end when creating a full stack application.

TECHNICAL SKILLS

Programming Languages:	HTML5, CSS3/SCSS, JavaScript(ES6)
Frameworks & Libraries:	React.js, Node.js, Express.js
Tools:	Git, PostgreSQL

WORK EXPERIENCE

Bombies Inc. <i>Production Manager</i>	Sun Valley, CA 2015 - 2018
--	-------------------------------

- Oversaw production of all e-liquids to ensure high quality FDA compliant products
- Increased sales by engaging audience with routine social media campaigns
- Reduced production time by implementing large mix by volume batches

EDUCATION

Pasadena City College 2009 - 2012	Pasadena, CA
California State University, Los Angeles 2013 - 2015	Los Angeles, CA
