FREDERICK CHON

Los Angeles, CA · frederick.chon@gmail.com · (626) 689-5030 · https://www.frederickchon.com

SUMMARY

Current self taught developer for the past year looking to transition into the web development field. Persistent learner interested in all aspects of web development and eager to learn. Experienced with HTML, CSS, JavaScript, React, Node, Express and actively learning more. Currently seeking a junior level front end position to work with and learn from experienced developers to grow not only as a developer but also as an individual.

PROJECTS

SmartBrain *JavaScript(ES6), React, Node, Express, PostgreSQL*
https://github.com/Frederick-Chon/smartbrain-face-recognition
Full stack application that connects to Clarifai's face detection API to get 4 coordinates around the detected face before using CSS to draw a box around the face. Includes authenthication with PostgreSQL implementation, encryption with bcrypt, authorization and a counter for how many faces were detected. The goals for this project were to understand how powerful component based designs can be and to understand how the front end works with the back end for a full stack application.

Nexter *HTML, CSS, SCSS*   https://github.com/Frederick-Chon/Nexter
Real estate agency landing page showcasing various homes in a beautiful grid layout. Built with HTML/CSS with a priority on utilizing CSS Grid to practice creating fluid grid layouts. The main goal of this project was to take advantage of how CSS Grid enables 2 dimensional layouts.

Trillo *HTML, CSS, SCSS*
All in one travel booking agency built with HTML/CSS. The main goal of this project was to practice using Flexbox to create layouts and position things without using floats.

Natours *HTML, CSS, SCSS*   https://github.com/Frederick-Chon/Natours
Tour guide landing page where users are able to book tours built with just HTML/CSS. Main purpose of this project was to practice using CSS's numerous pseudo classes and animations to create beautiful apps.

Budgety *HTML, CSS, JavaScript*   https://github.com/Frederick-Chon/budgety
Static JavaScript budgeting application to track monthly expenses. Goal of this project was to develop solid JavaScript and DOM manipulation fundamentals before moving onto any frameworks or libraries. One challenge was getting used to prototypical inheritance and the 'this' keyword.

WORK EXPERIENCE

Bombies Inc.   Sun Valley, CA
Production Manager   2015 - 2018

- Oversaw production of all e-liquid to consistent high quality FDA compliant products
- Increased social media exposure by creating creative campaigns to engage audience
- Reduced shipping time greatly by implementing large mix by volume batches during holiday sales
